PROFILE SUMMARY

A passionate Computer Science student interested in Full Stack Development, with experience in building web applications using modern frontend and backend technologies.

EDUCATION

Amity University, Noida , India	2022- 2026
Bachelor of Technology in Computer Science Engineering	Pursuing
Rani Laxmi Bai Memorial School, Lucknow, UP, India	Till July 2022
Class 12th : PCM, CBSE	Percentage: 88.00%
Class 10th : Science, CBSE	Percentage: 91.60%

WORK EXPERIENCE

GlobalLogic India (May 2025 - July 2025)

Software Development Engineer Intern ([Source code](#))

- Developed a RESTful backend using FastAPI to serve a product listing API by merging SQLite and JSON data, with dynamic pagination controlled via Flagsmith
- Enabled real-time monitoring with Prometheus, Grafana, and logging via Loki + Promtail.
- Containerized and deployed services using Docker & docker-compose; focused on observability and A/B testing.

Jabsz Gaming Studios LLP (May 2025 - July 2025)

Web Development Intern

- Collaborating with a 4-member team to design and prototype "Bullet Clicker," a browser-based reaction game using HTML, CSS, and JavaScript.
- Developed responsive controls (keyboard/mouse), real-time scoring, randomized target generation, and session timer for dynamic gameplay.

PROJECTS

Foodie Ordering System (March 2026)

- Developed a full-stack food ordering web application using Angular 17 and .NET 8 Web API.
- Implemented JWT-based authentication and role-based access for customers and administrators.
- Built features including shopping cart, order placement, order tracking, and delivery address management.
- Integrated SQLite with Entity Framework Core for database management and automated data seeding.

AI-Powered Microplastic Detection Using Smartphone-Based DIY Microscope (Dec 2025 - Present)

- Developed a low cost AI-based environmental monitoring system using a smartphone DIY microscope and CNN. Implemented image preprocessing, dataset balancing, and on device inference via TensorFlow Lite for real time binary classification of microplastics. Optimized imaging pipeline, UI integration, and offline deployment for scalable citizen science water analysis

AI driven 'Life Rewind' for Alzheimer's Patients (Feb 2025)

- Developed an AI-powered memory reconstruction system for Alzheimer's care.
- Enabled upload of photos, text descriptions, and voice notes by family members.
- Applied NLP and image processing to generate cohesive memory narratives.
- Integrated text-to-speech and video synthesis for personalized, narrated videos.
- Aimed to enhance memory recall, emotional engagement, and therapeutic support.

SKILLS

- Programming Languages: Python, Java, C#, SQL
- AI/ML: Natural Language Processing (NLP), Convolutional neural network
- Full Stack Development: Angular (Front-End), Node.js, RESTful APIs
- Web Development: HTML, CSS, JavaScript
- Database & Cloud: MySQL, MongoDB, SQLite

CERTIFICATIONS (LINK)

- [The Joy of Computing Using Python issued by IIT Madras \(NPTEL\)](#)
- [Data Analysis project using Microsoft Excel issued by Coursera](#)
- [AI craft 2.1 participation certificate issued by Amity Centre for Artificial Intelligence \(ACAI\)](#)
- [Web Development Projects completed as part of NeuroNexus Innovations](#)
